UP PATHCON 2026
XXXIII Annual Conference of UP Chapter of I.A.P.M.

UPPATHCON 2026

XXXIII Annual Conference of UP Chapter of I.A.P.M.

"Decoding Diseases: Clues to Conclusions"

Organised by:

Department of Lab Sciences Regency Hospital, Kanpur

CONFERENCE DATES

Workshops: 2nd October 2026
Conference: 3rd & 4th October 2026

VENUE

Virangana Rani Laxmibai Auditorium
C.S.J.M. University, Kalyanpur, Kanpur

ABOUT THE CONFERENCE

UP-PATHCON 2026 is the XXXIII Annual Conference of the Indian Association of Pathologists and Microbiologists (IAPM), UP Chapter. It is proudly organised by the Department of Pathology, Regency Hospital, Kanpur – one of the North India's premier multi-speciality teaching hospitals.

AUTOPSY

XXXIII Annual Conference of UP Chapter of I.A.P.M.
"Decoding Disease: Clues to Conclusions"

DATE	TIME	VENUE	SEATS
Friday, 2nd October 2026	11:00AM–4:00PM	Regency Hospital, Kanpur	Only 30—Max Register Early

ABOUT THIS WORKSHOP

Autopsy remains one of the most powerful tools for establishing cause of death, uncovering diagnostic errors and advancing medical knowledge. This hands-on workshop offers structured training in systematic post-mortem examination under expert guidance.

LEARNING OBJECTIVES

1. Systematic approach to post-mortem examination & organ dissection
2. Documentation, photography and medicolegal report writing
3. Histological changes in common systemic diseases at autopsy

WHO SHOULD ATTEND

Pathologists, MD/PGs

FACULTY

Expert faculty from leading medical institutions — to be announced shortly

QUALITY CONTROL IN HAEMATOLOGY

XXXIII Annual Conference of UP Chapter of I.A.P.M.
"Decoding Disease: Clues to Conclusions"

DATE	TIME	VENUE	SEATS
Friday, 2nd October 2026	11:00AM–4:00PM	Regency Hospital, Kanpur	Only 30—Max Register Early

ABOUT THIS WORKSHOP

Quality control (QC) in Hematology ensures accuracy, precision, and reliability of laboratory test results. It emphasizes the importance of maintaining standardized laboratory practices to produce valid and reproducible results. Participants will be introduced to internal and external quality control measures, calibration techniques, and error detection methods in Hematology analysers.

LEARNING OBJECTIVES

1. To understand the principles and requirements of quality control in haematology laboratories as per NABL/ISO 15189
2. To differentiate between internal and external quality control methods
3. To learn proper calibration and maintenance of haematology analysers
4. To identify sources of error in haematological testing and implement corrective measures.
5. To interpret quality control data and apply statistical tools for monitoring performance.
6. To ensure adherence to standard operating procedures (SOPs) and laboratory guidelines.

WHO SHOULD ATTEND

Pathologists, Haematologists, PG Residents, Quality Managers

FACULTY

Expert faculty from leading haematology departments — to be announced shortly

XXXIII Annual Conference of UP Chapter of I.A.P.M.
"Decoding Disease: Clues to Conclusions"

DATE	TIME	VENUE	SEATS
Friday, 2nd October 2026	11:00AM–4:00PM	Regency Hospital, Kanpur	Only 30—Max Register Early

ABOUT THIS WORKSHOP

This interactive hands on workshop on Immunofluorescence is designed to provide a comprehensive understanding of the principles, techniques, and diagnostic applications of immunofluorescence (IF) in both dermatopathology and renal pathology.

The workshop will cover the fundamentals of immunofluorescence, including specimen selection, biopsy techniques, transport media, and laboratory processing. Special emphasis will be placed on pattern recognition and interpretation in skin biopsies (autoimmune blistering disorders, connective tissue diseases, vasculitis) and renal biopsies (glomerulonephritis, immune complex-mediated diseases, and complement-mediated disorders).

LEARNING OBJECTIVES

1. Understand the basic principles and mechanisms of immunofluorescence.
2. Identify appropriate indications and biopsy sites for IF in skin and renal diseases.
3. Describe proper specimen handling, transport media (e.g., Michel's medium), and processing techniques.
4. Recognize key immunofluorescence patterns in dermatological conditions (e.g., intercellular, linear, granular).
5. Identify characteristic IF patterns in renal diseases (e.g., granular, linear, mesangial, full-house).
6. Differentiate between various autoimmune and immune complex-mediated disorders using IF findings.
7. Correlate clinical, histopathological, and IF findings for accurate diagnosis.
8. Recognize common technical errors and interpretative pitfalls in IF.

WHO SHOULD ATTEND

PG students and Practicing pathologists

FACULTY

The workshop will be conducted by experienced faculty with expertise in dermatopathology, renal pathology, and immunofluorescence techniques. To be announced soon

GROSSING & CAP BASED REPORTING IN GI TUMORS

XXXIII Annual Conference of UP Chapter of I.A.P.M.
"Decoding Disease: Clues to Conclusions"

DATE	TIME	VENUE	SEATS
Friday, 2nd October 2026	11:00AM–4:00PM	Regency Hospital, Kanpur	Only 30—Max Register Early

ABOUT THIS WORKSHOP

Accurate grossing and synoptic reporting of GI specimens directly impacts tumor staging, surgical planning and patient outcomes. This structured workshop focuses on CAP protocol based approach to grossing and reporting of esophagectomy , gastrectomy, pancreaticoduodenectomy and colectomy specimens.

LEARNING OBJECTIVES

1. Systematic grossing of esophagectomy, gastrectomy, pancreaticoduodenectomy and colectomy specimens.
2. CAP cancer protocols and mandatory elements in synoptic reporting.
3. Surgical margin assessment - Frozen section and permanent sections.
4. Structured lymphnode dissection, documentation and nodal ratio.
5. AJCC 8th Edition staging for esophagectomy, gastrectomy, pancreaticoduodenectomy and colectomy specimens.
6. APR specimen handling and CAP -based reporting.

WHO SHOULD ATTEND

Surgical Pathologists, PG Residents in Pathology

FACULTY

Expert GI Pathologists from tertiary cancer centres — to be announced

ABOUT THIS WORKSHOP

From Principles to Practice UPPATHCON 2026

This interactive, hands-on workshop is designed for pathologists, post-graduate residents, and lab professionals looking to strengthen their molecular diagnostic skills.

LEARNING OBJECTIVES

- **Fundamentals of Molecular Diagnostics:** Understanding the core principles of Polymerase Chain Reaction (PCR), RT-PCR, and Real-Time PCR (qPCR).
- **Step-by-step overview of nucleic acid (DNA/RNA) extraction** from various clinical samples (blood, tissue, swabs).
- **Hands-On Laboratory Experience:** Practical demonstration of reagent preparation and pipetting techniques.
- **Setting up the PCR Master Mix and loading the thermal cyclor.**
- **Best practices to prevent cross-contamination in a molecular lab.**
- **Data Interpretation & Analysis:** How to read and analyse amplification plots and melting curves.
- **Understanding Ct (Cycle Threshold) values and their clinical significance.**
- **Differentiating between true positives, false positives, and false negatives.**
- **Clinical Applications in Pathology: Infectious Diseases:** Rapid detection of pathogens (e.g., Tuberculosis, HPV, Hepatitis, Respiratory viruses).
- **Oncopathology:** Identifying genetic mutations and tumor markers for targeted therapies.
- **Genetic Disorders:** Carrier screening and diagnostic applications.
- **Troubleshooting & Quality Control:** Identifying and resolving common PCR errors and assay failures.
- **Implementing internal controls and understanding NABL/CAP quality guidelines for molecular testing.**
- **Interactive Q&A Session:** Discuss real-world case studies and diagnostic challenges with leading molecular pathologists.

WHO SHOULD ATTEND

Pathologists, Microbiologists, Molecular Biology researchers, PG Residents

MANUSCRIPT AND THESIS WRITING

XXXIII Annual Conference of UP Chapter of I.A.P.M.
"Decoding Disease: Clues to Conclusions"

DATE	TIME	VENUE	SEATS
Friday, 2nd October 2026	11:00AM–4:00PM	Regency Hospital, Kanpur	Only 30—Max Register Early

ABOUT THIS WORKSHOP

The session will cover the essential components of thesis writing, including framing research questions, literature review, methodology, results, and discussion. It will also focus on manuscript preparation for peer-reviewed journals, highlighting aspects such as journal selection, formatting, authorship criteria, plagiarism awareness, and responding to reviewers.

LEARNING OBJECTIVES

- Understand the structure and essential components of a scientific thesis and research manuscript.
- Formulate clear research questions, aims, and objectives for academic writing.
- Conduct and organize an effective literature review.
- Describe appropriate methodology and present results systematically.
- Develop skills in writing discussion and conclusion sections with critical analysis.
- Understand principles of referencing, citation styles, and avoidance of plagiarism.
- Identify suitable journals and understand manuscript submission requirements.
- Learn the process of peer review and strategies for responding to reviewers' comments.

WHO SHOULD ATTEND

Postgraduate students and residents, Early-career researchers and academicians
Medical and allied health science professionals, Faculty members guiding thesis and dissertation work

FACULTY

Experienced faculty members with expertise in academic research, thesis supervision, and scientific manuscript writing -
To be announced shortly
